

Associate Membership Business Application

Our Associate Membership (Business) is available to companies and other organisations which have waste management / recycling operations that supplement their core business. For example businesses with composting machinery, farms with waste management equipment or not for profit organisations with an interest in waste and recycling. An associate member may also be a supplier to the waste management and recycling / secondary reprocessing industry as part of their wider operations or partner with an industry operator as part of its core activities. Associate member representatives may attend Annual General Meetings in an observer capacity and can serve on an established technical group, but cannot nominate or be nominated for the Executive Committee and have no formal voting rights.

This membership category is suited to all companies that are involved in the waste and recycling industry or have waste management as a key, but not core, part of their business and wish to engage with members.
